WEBSITE DESIGN & DEVELOPMENT

Websites that work as hard as your brand.

Beyond logos and identities, I design and build complete websites for businesses — custom layouts, mobile-first, with an admin panel so clients can manage their own content.

01

Omoniyi AJ & Associate

Real estate website with property listings, agent profiles, branches and a full admin dashboard.

Client project

02

A. Z. & Mojies Venture

Trading and advisory website covering merchandise, import & export and investment advisory, with a full admin panel.

WEBSITE DESIGN — CASE STUDY

Omoniyi AJ & Associate

Real estate website for a Nigerian property company

THE BRIEF

A real estate company with branches across Nigeria needed a credible online presence — one place to showcase properties for sale and rent, introduce its agents, and turn visitors into inquiries.

THE APPROACH

Designed a clean, editorial layout in a deep green and gold palette taken from the client logo, with a bold serif headline style. Built the site in PHP and MySQL with filterable property listings, detailed property pages, and a custom admin dashboard.

THE RESULT

A fast, professional site where the team can add properties, agents, branches, gallery media and testimonials themselves — and receive every inquiry in one inbox.

DESIGN SYSTEM

Typography: Playfair Display (headlines) + Inter (body)

KEY FEATURES

- Listings filtered by category, type and status
- Property pages with image and video gallery
- Agent and branch directory
- Testimonials and gallery sections
- Inquiry forms feeding an admin inbox
- Secure admin: properties, agents, branches, settings

SITE STRUCTURE

BUILT WITH

A. Z. & Mojies Venture

Trading and advisory website — azmojiesventure.org

THE BRIEF

A trading and consultancy firm operating since 2020 needed one credible website for three lines of business — merchandise, import & export, and investment advisory — that would turn visitors into quote requests and inquiries.

THE APPROACH

Built the site around the three services, with a navy and gold palette taken from the client logo for a trustworthy, premium feel. Added a filterable product catalogue, a gallery with lightbox, smooth GSAP and scroll animations, and AJAX forms so visitors never leave the page.

THE RESULT

A live, mobile-first website where the client manages products, categories, gallery items and incoming inquiries from their own secure admin panel.

DESIGN SYSTEM

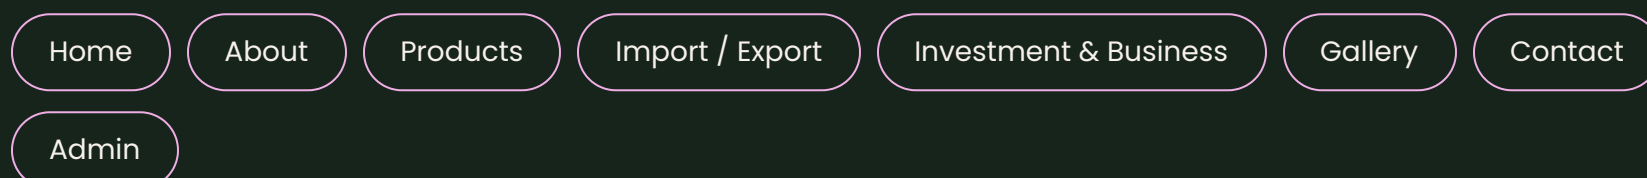

Typography: Playfair Display (headlines) + Inter (body)

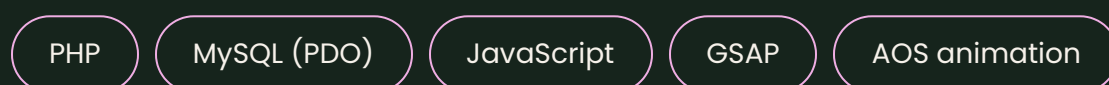

KEY FEATURES

- Filterable product catalogue with images and video
- Import & export service page with inquiry form
- Investment & business advisory page
- Gallery with lightbox
- Admin: products, categories, gallery, inquiries, settings
- Brute-force login lockout and hashed passwords

SITE STRUCTURE

BUILT WITH

BeanBox Café

Brand identity concept for an independent café brand

THE BRIEF

A fictional independent café needed a warm, modern identity that felt handmade — not corporate — and worked equally well on a coffee cup and a takeout bag.

THE APPROACH

Designed a simple cup-and-steam mark paired with a rounded serif wordmark, built around a warm cream-and-espresso-brown palette for a cozy, artisanal feel.

THE RESULT

A clean, flexible identity system applied consistently across cups, packaging, and signage — instantly recognisable at a glance.

FitZone

High-performance brand identity for a modern gym

THE BRIEF

A modern gym brand wanted a logo that felt energetic and bold — something that could stand alone as an icon on apparel and equipment.

THE APPROACH

Built a dynamic "FZ" monogram in motion-inspired blue and green, paired with a strong geometric wordmark for maximum impact at any size.

THE RESULT

A punchy, versatile mark that reads clearly on a business card or a gym wall — reinforcing raw strength and energy.

Axis Performance

Full brand rollout across apparel, merchandise, and interior space

THE BRIEF

A performance gym brand needed a mark strong enough to carry across a full space — walls, apparel, and merchandise — not just a logo on paper.

THE APPROACH

Created a bold, minimal arrow-mark in monochrome, designed to scale from a water bottle to a full accent wall without losing impact.

THE RESULT

A cohesive brand environment where every touchpoint — shirt, wall, and cup — reinforces the same premium, focused identity.

Aura

Packaging identity concept for a beauty brand

THE BRIEF

A beauty brand concept needed packaging that felt premium and soft, appealing to a modern, self-care-focused customer.

THE APPROACH

Used a soft blush palette with a minimal serif logotype, keeping every product in the line visually unified on the shelf.

THE RESULT

A cohesive, shelf-ready packaging suite that reads as premium without feeling cold or overly clinical.

Nordic Film Festival

Poster and stationery concept for a cultural event

THE BRIEF

A film festival concept needed a poster and identity system that felt cinematic and distinctly Nordic — moody, but inviting.

THE APPROACH

Illustrated a layered mountain-and-ship scene in a muted navy palette, carried through onto business cards and stationery.

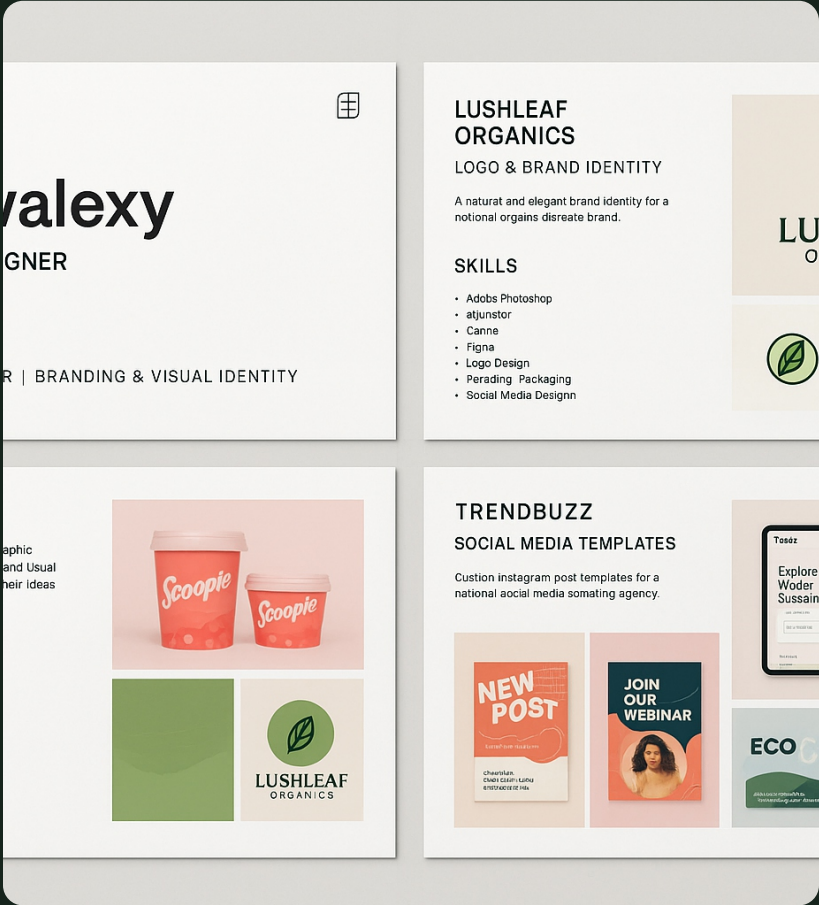

THE RESULT

A striking, story-driven poster design that works as a standalone piece of art as much as an event promotion.

SOCIAL MEDIA & MARKETING DESIGN

Business Marketing Pack

A cohesive visual system for social media graphics — logos, templates, and packaging mockups designed to improve engagement and brand recognition across a client's channels.

Let's work together.
